

## J J Flyover

Project:	J J Flyover
Location:	Mumbai
Total Tonnage:	765 MT
Prestressing System:	Freyssinet 19K13, 7K13
Project Duration:	12 Months
No. of Segments:	654
Key Challenge:	The entire stretch of the 2.4 km long flyover is densely populated, multiplying the difficulty of construction. The flyover was constructed with pre-cast segments, with each span being casted in 33 pieces and connected at site by longitudinal and transverse prestressed cables.
